# eLife

**eLife:** The advanced app framework that enables colleges and universities to manage a wide variety of non-academic programs, activities, and data.

The *e*Life app framework is built on the FileMaker Platform to offer cross-platform support and enable a set of desktop and mobile app functionality that can be integrated with Ellucian® Banner® or other student information systems (SIS). Adopt Colibri's *e*Life frameworks for housing, student activities, programs and special events, registration and attendance, transportation, and time clocks, and work with us to tailor *e*Life to your specific needs.

---

Major Components of the *e*Life Framework

General System Features – The *e*Life Framework features a fast, scalable database engine with support for hundreds of concurrent desktop and mobile users, cloud or on-campus network options, and multiplatform support. *e*Life offers a clean, intuitive user interface in an SSL-secure environment for up to 16 different user groups with support for term-based on- and off-loading of student users. Customizations are possible for a wide variety of uses and third-party software API integrations.

*e*Life Dashboard – The *e*Life Dashboard provides users with at-a-glance information on activities/to-dos, dorm programs and logs, club information, and community engagement programs. It also provides the student center front desk with a convenient interface to log all requests for information, view upcoming student events and even sell tickets. Users see only the dashboards relevant to their role within *e*Life.

Housing Management – Hall directors and residential assistances (RAs) take advantage of *e*Life to manage dorm access, record interactions with residents, document room damages and other incidents, and log ongoing hall activity. In addition, *e*Life stores residential rosters and manages housing council meetings. *e*Life can also be used to manage the interview process for new RAs.

Programming – *e*Life features support for a wide range of non-academic events and programs related to dorms, clubs, student activities, volunteer organizations, or even the student government's activities group scheduling concerts and other campus-wide events. Track proposals, approvals, budgets, registration, and attendance.

---

Student Activities – *e*Life allows universities to manage all aspects of student clubs and other RSOs. Track CAB event registration, ticket sales, and attendance like other types of event programming.

Student Leadership and Volunteerism – *e*Life manages all programs and events, whether single day efforts like community cleanups or ongoing activities like tutoring. Handle schedules and registration, track attendance, and even assign academic credits or points toward housing priority.

Event Transportation and Attendance – With so many possible programs, events, and volunteer shifts, it's inevitable that your students are going to need transportation to off-campus locations. Use *e*Life built-in event transportation scheduler to marry drivers, vehicles, and the people who need rides and make sure everything goes off without a hitch.

Term-Based Reporting – *e*Life comprehensive term-based reporting for clubs and community events track participation by year, gender, race and housing and athletics status and help administrators see how your non-academic programs help student performance and the surrounding community.

## *e*Life Framework Requirements

Client Workstation - Windows® 10/11 or MacOS® 12/13; FileMaker Pro 2023; Multi-core Intel PC or Mac or Apple Silicon-based Mac; 8 GB RAM or greater; 1000BT NIC or WiFi 6e. Compatible with Citrix® XenApp.

Server - Windows Server 2019/2022 or Ubuntu 20.04 or 22.04 LTS Server; FileMaker Server 2023; 16 GB RAM; RAID 5 configuration preferred; 1000BT network interface card.  Compatible with Citrix® XenApp 7.16+ and VMware® virtual server environments. Cloud options available upon request.

## Licensing and Support

*e*Life is available with a range of licensing, customization, and support options. Contact us for more information and to arrange an assessment of your needs.
